CAPITUP INDIA PVT. LTD.

dhAIrya

Every policy, roster and ledger on one desk.

HR SETUP GUIDE · BETA

Your first day on dhAIrya, CapitUp India's group health benefits portal: signing in, checking your policy and CD balance, your member list, endorsements, claims analytics, requests to CapitUp, and getting your employees on board.

Version 1.0 · November 2026 | For client HR teams | We Back You Up

Welcome to dhAIrya

Dhairya means steadiness. dhAIrya brings your company's group health policy, active member list, CD (cash deposit) ledger, endorsements, claims insights and your requests to CapitUp into one secure place, with an AI copilot that answers from your own policy schedule.

What's in this guide

Page	Topic
3	Signing in, your first password, and your menu
4	Executive Overview: your policy, CD balance and lives
5	Employee Directory and getting employees signed in
6	Endorsement Engine: sending joiners and leavers
7	Claims Analytics, Request Queue, Privacy Requests and Ask Copilot
8	What your employees see
9	Beta notes, your data, feedback and support

Before you start, CapitUp has already

- set up your company, your policy and its rate card in dhAIrya;
- loaded your active member list from the insurer / TPA;
- created your HR login. Your **work e-mail** and a **temporary password** reach you in a separate e-mail from CapitUp. We never put passwords in the launch e-mail or in this guide.

Your first day, in eight steps: sign in → set your password → check your policy and CD balance → check your member list → tell employees how to sign in → send your first endorsement → raise a request to CapitUp → try the copilot and claims analytics. Each step is on the pages that follow.

This is a beta. Let's back each other up.

Our promise to every client is **"We Back You Up."** dhAIrya is in **beta**: some screens will change and a few things aren't perfect yet. Every note you send reaches the team that builds it, and we'll keep improving dhAIrya with your feedback. Page 9 lists what to expect in this beta.

Signing in

1. **Open the HR & admin sign-in page: portal.capitupindia.com/portal-login**. Enter your **Work e-mail** and the temporary **Password** from CapitUp, then click **Sign in**.
2. **Set your permanent password.** A window titled **Set your permanent password** asks for the temporary password and then your new one twice. Save, and you land on **Executive Overview**, where a **Getting started** checklist tracks your first-day steps.

> **Forgot your password?** Self-service "Forgot password" isn't built yet. Write to CapitUp and we'll issue a new login. After repeated wrong passwords the account locks for your safety; we can unlock it. dhAIrya also signs you out after **10 minutes idle**, with a "Still there?" warning first.

Two sign-in pages. HR uses **/portal-login** (e-mail + password). Employees use the main page **portal.capitupindia.com** with a one-time code. Each page links to the other ("HR & admin sign-in" / "Employee portal"), so nobody gets lost.

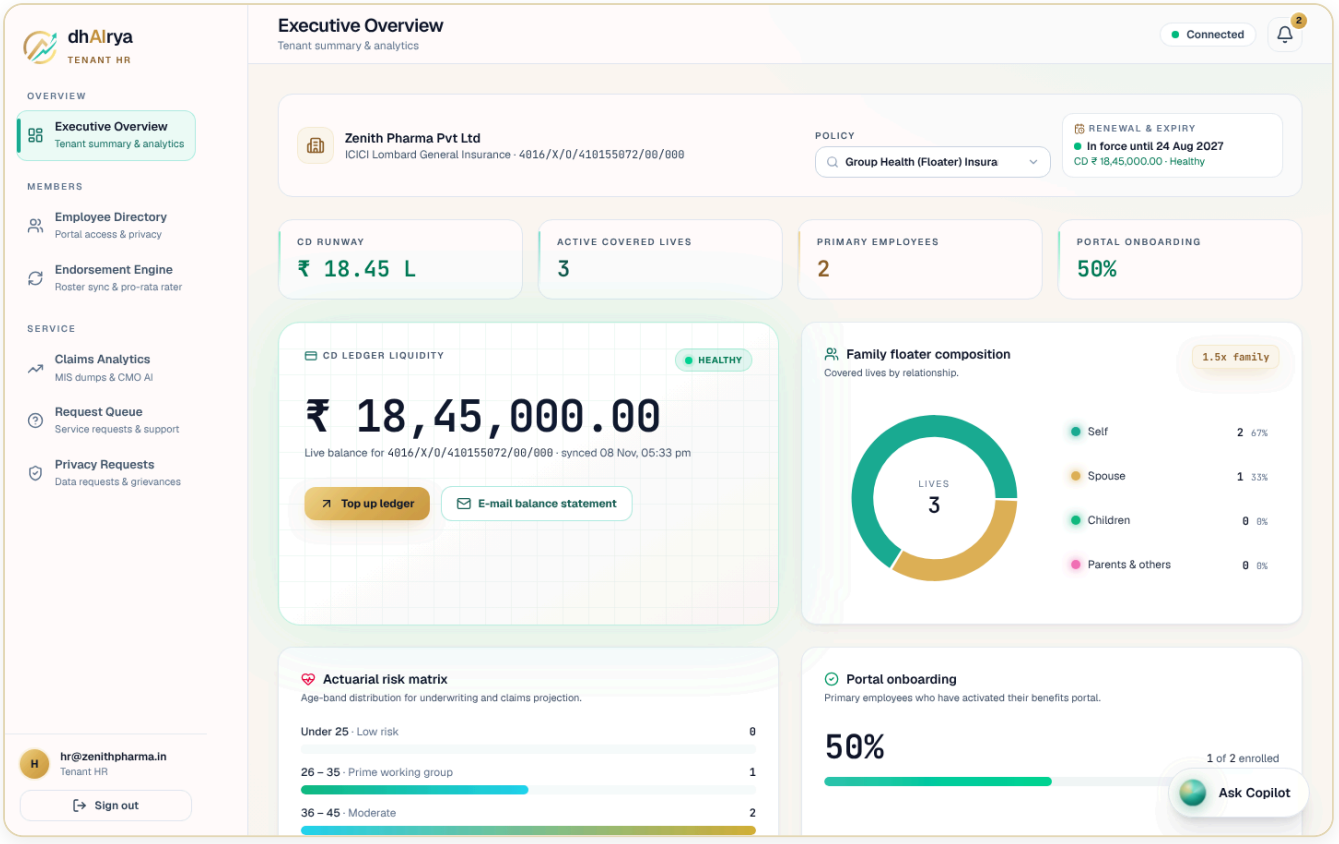

Your menu

Menu item	What it's for
Executive Overview	Your policy, renewal, CD balance, lives and portal onboarding at a glance (page 4)
Employee Directory	Your active roster, portal status, export, and fixing employee e-mails (page 5)
Endorsement Engine	Upload joiners, leavers and corrections; premium worked out for you (page 6)
Claims Analytics	Upload your TPA claims MIS for an instant analysis (page 7)
Request Queue	Raise tickets to CapitUp and follow replies (page 7)
Privacy Requests	Employees' data access, correction and erasure requests (page 7)
Ask Copilot (bottom right)	Ask questions about your policy in plain words (page 7)
Bell icon (top right)	Your recent notifications

Only your company, always. Your HR login is tied to your company. You see only your own policy, members, ledger and tickets; other CapitUp clients are never visible to you. Approving endorsements and creating logins stay with CapitUp.

Check your policy and CD balance

Executive Overview is your home page. Pick a policy at the top if you have more than one.

Executive Overview for a demo company (Zenith Pharma, fictional data).

On screen	What it tells you
Company & policy bar	Your company, insurer and policy number. Confirm these first.
Renewal & expiry	The date the policy is in force until, and your CD health.
CD runway / CD ledger liquidity	Your live CD balance, with a "synced" time stamp. **E-mail balance statement** sends a statement to you or your finance team.
Active covered lives / Primary employees	Everyone on the policy, and how many of them are employees.
Family floater composition	Lives split by Self, Spouse, Children, Parents & others.
Actuarial risk matrix	Lives by age band.
Portal onboarding	The share of employees who have signed in to dhAIrya.
Last endorsement sync	When your last endorsement went through.

> **Top up ledger** is visible to you, but top-ups are done by CapitUp for now. Raise a *CD Ledger Top-Up Query* in Request Queue, or write to us.

Check your member list

4 **Open Employee Directory.** Use the filters **All Lives**, **Employees** and **Dependents** to check that everyone is there, or search by Emp ID, name or e-mail. Click **Export Active Roster (.xlsx)** for an offline check. Each row shows portal status: Active, No Account, Terminated or Anonymized.

Fix a missing or wrong e-mail: click the **pencil** next to the employee, correct it in **Update Member Email Address**, and save. **Without an e-mail on the roster, an employee can't receive a sign-in code.** There's no SMS or WhatsApp code yet.

Get your employees signed in

5 **Share the employee sign-in steps** below (an internal mail or your intranet works well). The **Unboarded** filter in Employee Directory shows who hasn't signed in yet, and the **Portal onboarding** tile on the Overview shows the percentage.

Employee sign-in, in five steps

1. Open **portal.capitupindia.com**
2. Under **Company**, start typing the company name and pick it.
3. Enter **Employee ID** and **Date of birth**, then click **Send sign-in code**.
4. Check work e-mail for a message from “CapitUp Security” with the subject “<Company> Portal - Your Login OTP”.
5. Enter the **6-digit code** (valid for 10 minutes) and click **Verify and sign in**.

Who is on the roster

Employees don't sign up. They can sign in because they're on your policy's active roster: the active list CapitUp loaded at set-up, plus every endorsement approved since. New joiners can sign in once their endorsement is approved.

> **About the Invite Link button:** it copies a link to the employee sign-in page. In this beta it doesn't fill in the Employee ID for them yet, so share the five steps above with it.

CapitUp's welcome e-mail. CapitUp can also send each employee a welcome kit from `info@capitupindia.com` with their e-card and claim form attached. Tell us when you'd like it to go out.

Send your first endorsement

Add joiners, delete leavers and correct details. dhAIrya reads your sheet, works out the pro-rata premium and GST, checks your CD balance and sends the batch to CapitUp for approval. (The page heading may read “Endorsement Studio”.)

1. Click **Endorsement Engine** and drop your sheet (CSV or Excel, including password-protected Excel).
2. Check **How the sheet was read** (use **Check columns** if a column was matched wrongly), then click **Run reconciliation**.
3. Review the tabs **Additions**, **Deletions**, **Corrections**, **Skipped** and **Blocked errors**, and the **Projected balance** in the financial ledger projection. Click any member for the full premium working.
4. Name the batch and use **Slide to submit batch**.
5. Watch **Recent batches for this policy**: **Waiting for approval**, then **Approved** or **Sent back** with CapitUp's note.

Your sheet: any layout works

Columns are matched by meaning, so you can keep your own format. For a clean start, these are the columns we use:

Column	What to put in it
`ACTION`	ADD, DEL, or a correction
`EMPLOYEE ID` / `EMPLOYEE NAME`	As on your HR records
`RELATION`	Self, Spouse, Child, Father, Mother or in-laws, as your policy allows
`DOB` / `DOJ` / `DOS`	Date of birth, date of joining, date of separation (for deletions)
`SUM INSURED`	The member's cover amount
`EMAIL`	Needed for the employee to sign in to dhAIrya

Gender and phone are read too, if present.

> **CD balance short?** The batch is blocked with “Ledger deficit: transaction blocked”. You can e-mail the shortfall to your finance team from the same screen; once the CD is topped up, submit again.

Approval is by CapitUp. You get an e-mail when a batch is **approved** (with your new CD balance) or **sent back** (with the reason), and the status shows under Recent batches.

Request Queue: talk to CapitUp

7 Click **Request Queue** → **Raise New Support Request**. Pick a **Request Category** (File / Copy Request, Add Dependent, Submit Claim, Member Demographic Correction, Claims Escalation Support, CD Ledger Top-Up Query), a **Priority**, a subject and details, attach a file if needed (up to 25 MB), then **Submit Ticket**.

Your tickets, your employees' requests and CapitUp's replies (including files we send back) all appear under **Support Tickets & Requests**. In this beta, CapitUp closes requests, including ones employees send.

Ask Copilot and Claims Analytics

8 Click **Ask Copilot** at the bottom right and try *"What is our room rent limit?"*. Quick prompts cover room rent cap, maternity, pre-existing disease waiting periods and co-pay.

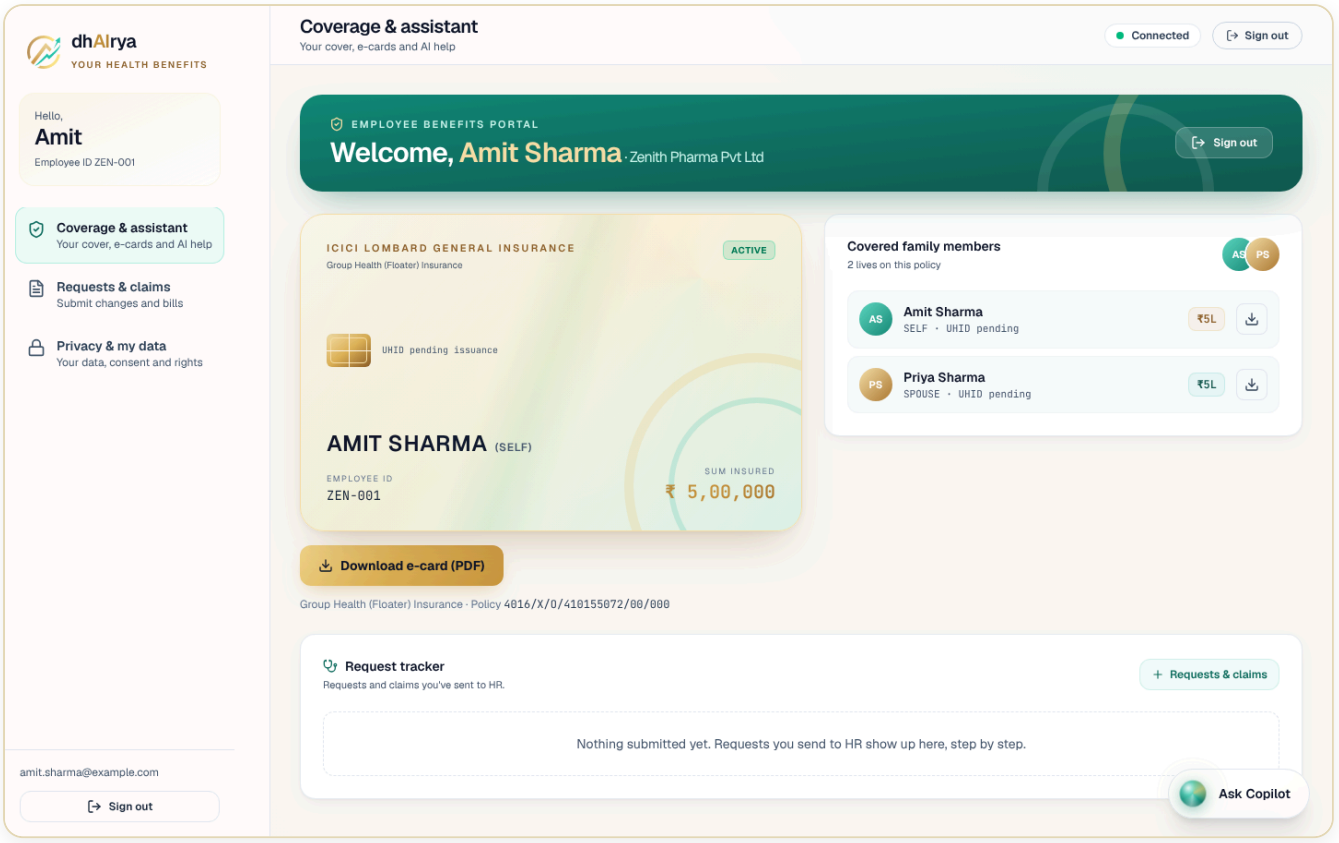

Claims Analytics
Drop your TPA claims MIS into **Drop the Claims MIS / TPA Dump Here** (or start from **Download a blank MIS template (CSV)**). You get tabs for Overview, Claims Analysis, Deductions, Leakages, Coverage Recommendations and Wellness, and can **Download boardroom report (HTML)**. Your analysis is for internal use; an official report is published by CapitUp.

Privacy Requests
When an employee asks to see, correct or erase their data, or raises a grievance, it lands here. Use **Mark in progress**, **Resolve** or **Reject** with a note the employee will see. Overdue requests are flagged.

> **AI answers can be wrong.** The copilot, the claims insights and the policy reading all work from your policy schedule and files, but your **policy document is always final**. If an answer looks off, tell us.

Your health cover, steady and clear

After signing in and agreeing to the personal-data notice, employees land on **Coverage & assistant**.

Employee home for a demo employee (fictional data).

Menu	What employees can do
Coverage & assistant	See their e-card (insurer, plan, Employee ID, sum insured), **Download e-card (PDF)**, see **Covered family members** with a download per member, and follow the **Request tracker**.
Ask Copilot	The Policy Copilot answers from your company's policy: room rent cap, maternity, cashless hospitals, waiting periods.
Requests & claims	**Add Dependent** to register a spouse or child, with request history and replies. **COMING SOON** Submit Claim and Correct Details.
Privacy & my data	Their consent, a summary of the data held, requests and grievances, and nominee details.

> **E-cards appear once CapitUp uploads your insurer's e-card PDFs.** Until then, an employee sees “E-Card not available yet. Please contact HR.” Claims still go through your TPA as today.

Good to know in this beta

What you may notice	What to do
No “Forgot password”	Write to CapitUp for a new login.
Endorsements wait for approval	CapitUp approves them; you get an e-mail either way.
You were signed out	dhAIrya signs you out after 10 minutes idle. Sign in again.
An employee can't sign in	Check their e-mail on the roster (Employee Directory → pencil). Codes go only to that e-mail.
“E-card not available yet”	CapitUp is still uploading the insurer's PDFs for your policy.
Top up ledger gives an error	Top-ups are done by CapitUp for now; raise a CD Ledger Top-Up Query.
You can't close an employee's request	CapitUp closes requests in this beta; add your note in the ticket.
Older page headings	“Endorsement Studio”, “Claims Analytics Engine” and “Service Desk & Support Helpdesk” are the same pages as in your menu.
On your phone	dhAIrya is designed for desktop first and works in a mobile browser. There's no app yet.

How fresh is the data? dhAIrya has no single “data as of” date. It is as current as the last active list, endorsement and claims file loaded for your company. Your CD balance is live, with a “synced” time stamp. To see exactly what's in, check *Recent batches* on the Endorsement Engine page and *Last endorsement sync* on the Overview.

Back us up with your feedback

Tell us what works, what doesn't and what you'd like next, using the **Share your feedback** button in your launch e-mail (two minutes). Something not working? Click **Report a problem** at the top of any page; it reaches CapitUp directly with the page you were on. For service requests, use **Request Queue → Raise New Support Request**.

Quick answers

Can other companies see our data? No. Your login sees only your company.
Can I add another HR colleague? Yes: ask CapitUp and we'll create their login.
Who approves endorsements and closes requests? CapitUp, in this beta.
Where do claims go? To your TPA, as today. dhAIrya's claims tools are for analysis.

Need help? Reply to your launch e-mail or write to **info@capitupindia.com**. CapitUp India Pvt. Ltd., HITEC City, Hyderabad. **We Back You Up.**
