CAPITUP INDIA PVT. LTD.

HR SETUP & USER GUIDE · BETA

Dhairya

the CapitUp Benefits Portal

Everything your HR team needs to get started: signing in, finding and downloading employee e-cards, checking family coverage, onboarding employees and sharing feedback with us.

Version 1.0 · November 2026 | Data as of 16-Sep-2026 | We Back You Up

Welcome to Dhairya

Dhairya brings your organisation's group health policy, active member list and every employee's family e-card into one secure place. Questions that used to take a chain of emails (*"Can you resend my card?"*, *"Is my mother covered?"*) now take a few seconds.

What's inside this guide

Page	Topic
3	Signing in and finding your way around
4	Finding and downloading an employee's e-card
5	Downloading e-cards in bulk
6	What your employees will see, and how to onboard them
7	Sharing feedback with us during the beta
8	Your data, privacy, support and FAQs

This is a beta. Let's back each other up.

Our promise to every client is **“We Back You Up.”** Dhairya is in **beta**: some screens will change and a few things may not be perfect yet. Every comment you send reaches the team that builds the portal, and we will keep improving it with your feedback.

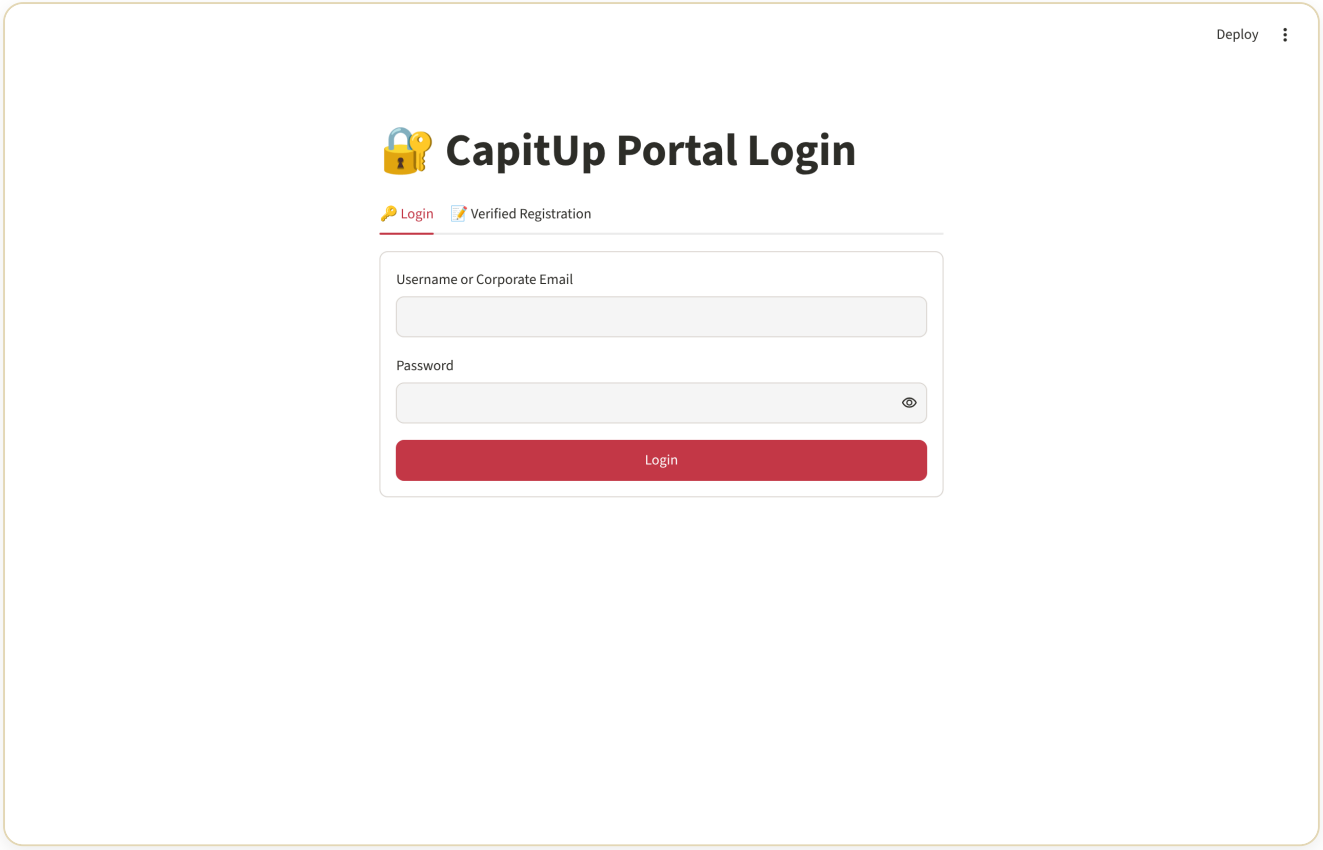

> **Data current as of 16-Sep-2026.** Policy details, active lists and e-cards in the portal reflect the files your team shared with CapitUp up to this date. Additions, deletions and corrections made after that will show after our next update.

What you need

- The portal link from your launch email.
- The email address CapitUp invited (your official work email).
- A modern browser: Chrome, Edge, Safari or Firefox, on desktop or mobile.

Signing in

1. Open the portal link from your launch email.
2. Sign in with the username or work email and password set up for you. First-time users can use **Verified Registration**: enter your invited work email, choose a password (at least 8 characters), and type the 6-digit code we email you. The code is valid for 5 minutes.
3. After signing in, use the menu on the left to switch between the **HR view** and the **Employee view**.

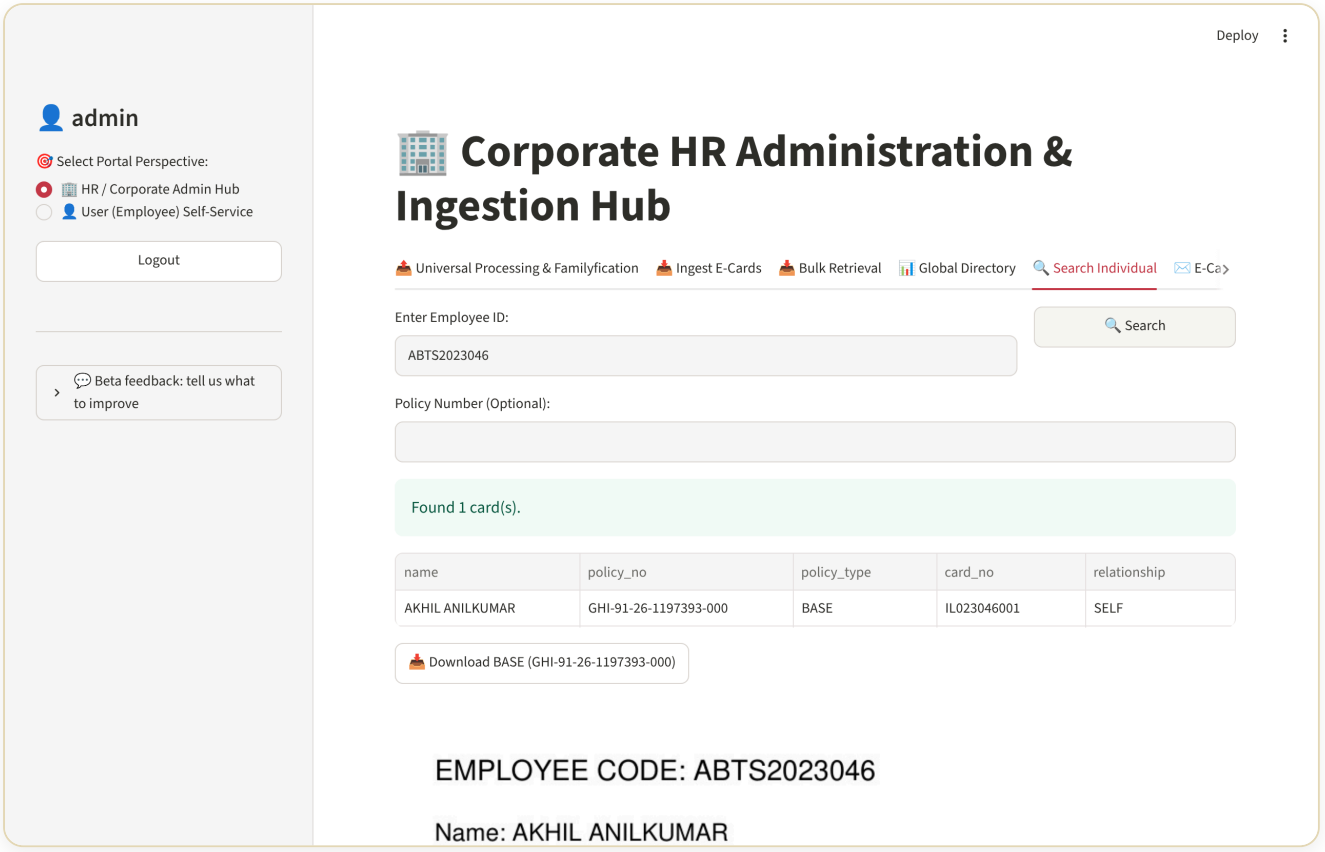

The sign-in screen. Use the **Login** tab once your account is set up.

Tip: keep your password private and sign out from shared computers using the **Logout** button in the left menu.

Find and download one employee's e-card

1. Open the **Search Individual** tab.
2. Type the **Employee ID** exactly as it appears in your active list (for example `ABTS2023046`). Add the policy number only if the employee has more than one policy.
3. Click **Search**. You will see the family members on the card, a preview of the card, and a **Download** button for each card type (Base and Top-up).

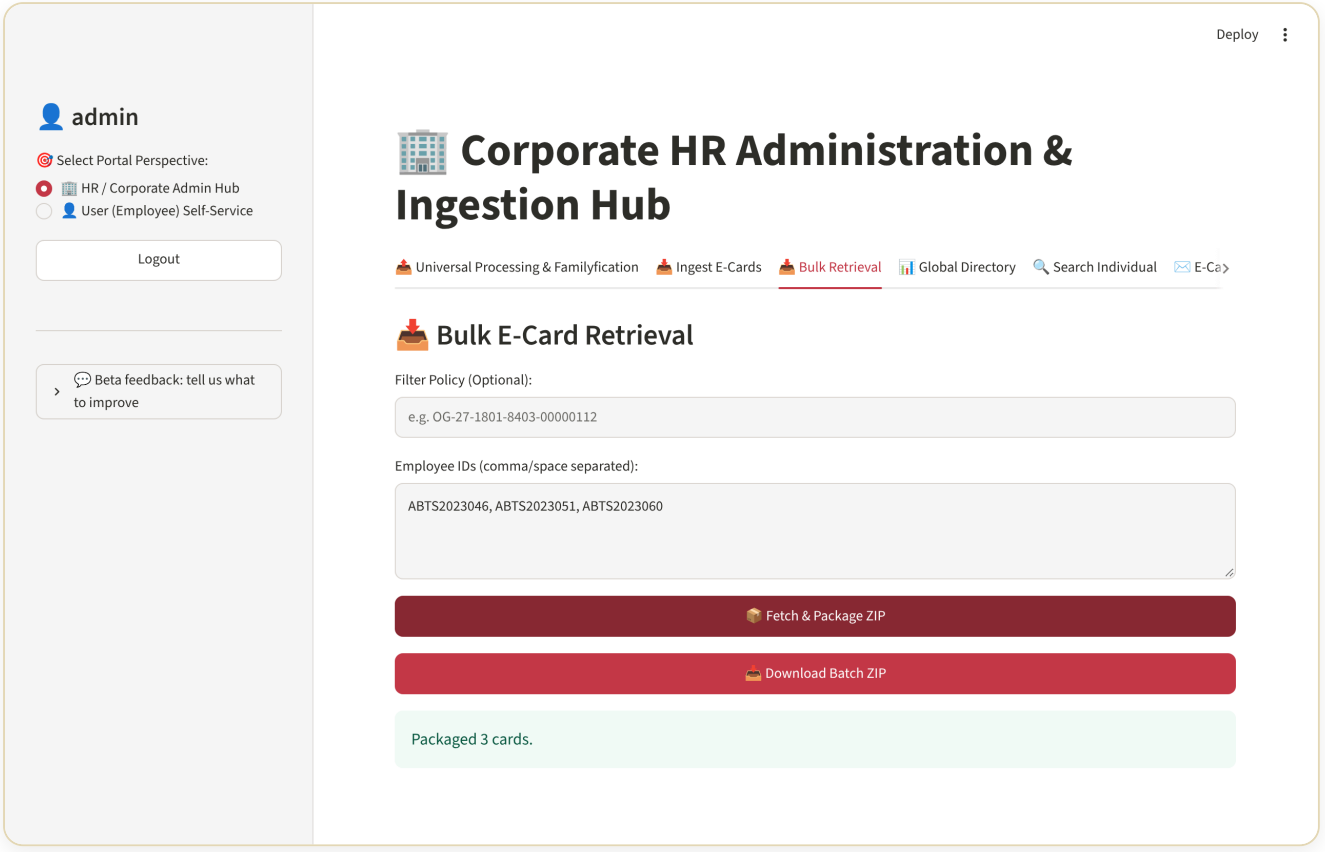

Search result: family members on the card, the download button and a live preview. (Sample data shown.)

Can't find someone? Check the Employee ID for typos or extra spaces. If the employee joined after 16-Sep-2026, their card will appear after our next update. You can tell us via the feedback box.

Download e-cards in bulk

Ideal for onboarding batches, audits, or sharing cards with a branch office.

1. Open the **Bulk Retrieval** tab.
2. Paste the Employee IDs, separated by commas, spaces or new lines. You can copy a column straight from Excel.
3. Optionally enter a policy number to limit the results to that policy.
4. Click **Fetch & Package ZIP**, then **Download Batch ZIP**. Each file is named `POLICY_EMPLOYEEID_CARDTYPE.pdf`.

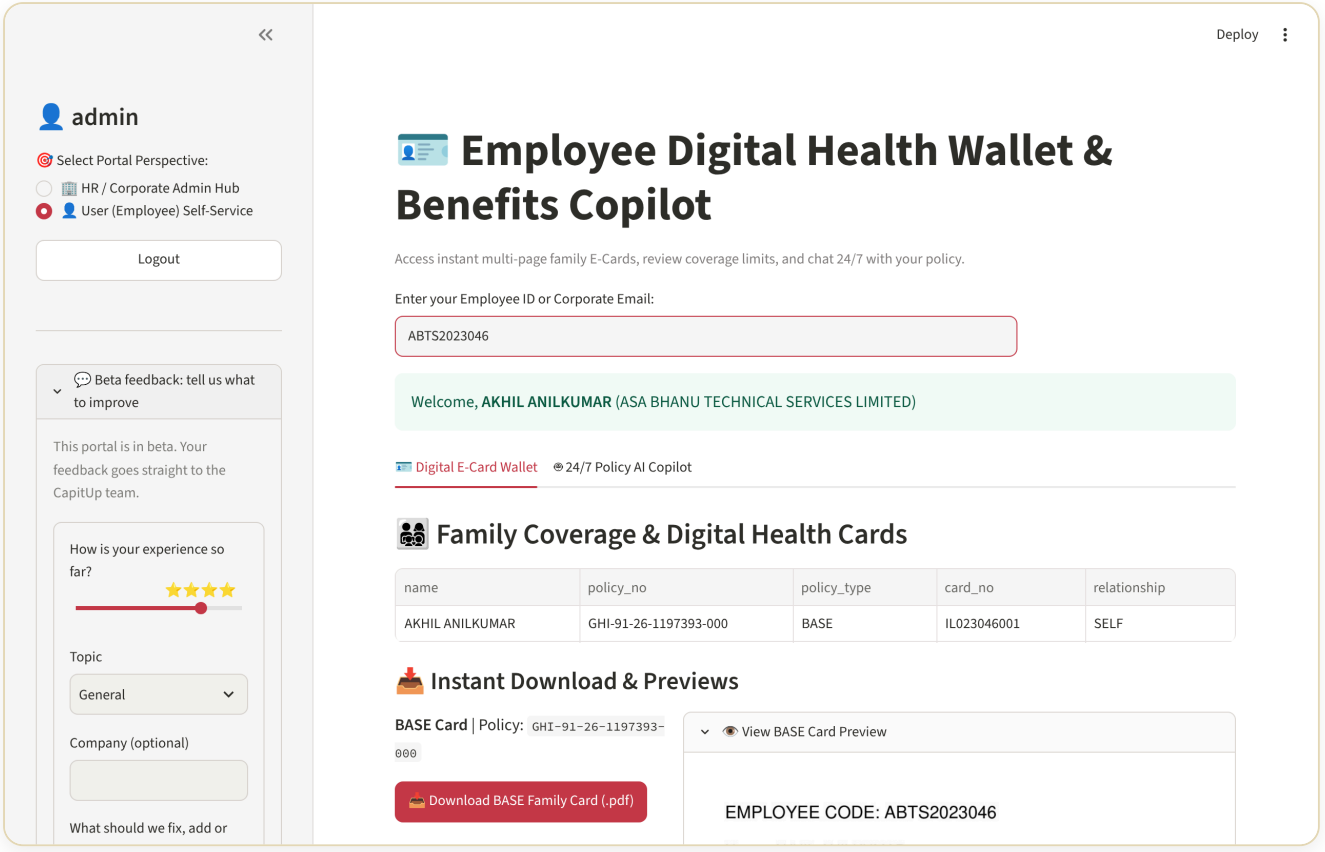

Three cards packaged into one ZIP. (Sample data shown.)

What your employees will see

Each employee gets a personal dashboard. Once they open it they can:

- **Download family e-cards** any time, on any device.
- **See who is covered**: dependents, relationships, card numbers.
- **Chat with their policy** for quick answers on room rent, maternity, cashless and reimbursement claims.

The employee dashboard: family coverage and card download. (Sample data shown.)

How to onboard your employees. Send support@capitupindia.com a sheet with three columns:

Employee ID	Employee name	Official email ID
ABTS2023046	Akhil Anilkumar	akhil@yourcompany.com

We will load it and send each employee a branded invitation to their dashboard. Only the employee themselves (Self) needs a row; dependents are picked up from the e-cards automatically.

Help us make Dhairya perfect

You can reach us two ways. Both go straight to the CapitUp product team.

1. Inside the portal

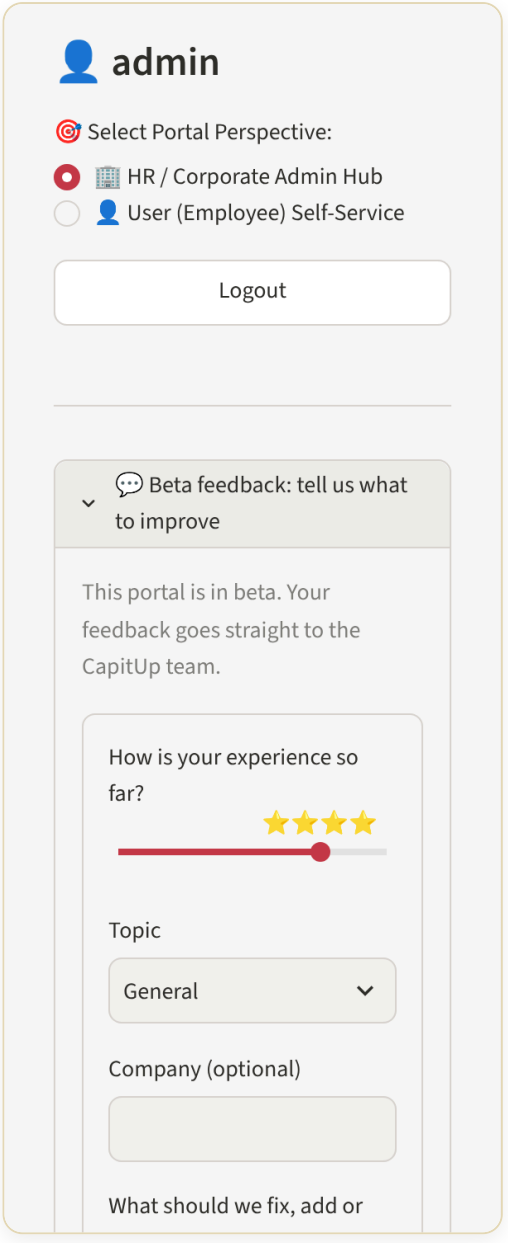

1. In the left menu, open **Beta feedback: tell us what to improve**.
2. Rate your experience, pick a topic, and write what we should fix, add or keep.
3. Click **Send feedback**. That's it.

2. The feedback form

Use the **Share your feedback** button in your launch email. It opens a short form with your details already filled in.

What helps us most

- The Employee ID or screen you were on.
- What you expected to happen, and what happened.
- Ideas for features your team would use every week.

You back us up, we back you up.

We review every response, reply where we need more detail, and ship improvements regularly during the beta.

Your data and how to reach us

Where the data comes from

Everything in the portal comes from your insurer's policy copy, your active member list and the e-cards issued by the insurer or TPA, as shared with CapitUp. **The current snapshot is as of 16-Sep-2026.** Endorsements (additions and deletions) processed after that date will appear after our next update.

Privacy

- E-cards contain personal and health information. Download them only for official use and share them only with the employee concerned.
- Do not share your portal login. Each HR team member should have their own access.
- If you spot data that belongs to someone else, tell us immediately at support@capitupindia.com.

Support

Frequently asked questions

Question	Answer
An employee's card is missing.	They may have joined after 16-Sep-2026, or the ID may differ from the active list. Send us the Employee ID and we'll check.
A dependent is missing or a name is misspelt.	Send the correction through feedback or email. We will raise it with the insurer and refresh the card.
Can employees use it on their phones?	Yes. The portal works in any modern mobile browser.
Is the policy chat a substitute for the policy document?	No. It gives quick general answers. The policy copy and the insurer's decision always apply.
Will the portal change during the beta?	Yes, based on your feedback. We'll tell you about bigger changes in advance.
